

Fully Automatic Aluminium Foil Container Making Machine & Dies

Fully Automatic Foil Container Making Machine complete with Decoiler, Lubricator and electronic feeder.

- 1) Unwinder or decoiler
- 2) Automatic foil Lubrication on both side
- 3) Pressure / nipping Head
- 4) Electronic feeder. Length can be regulated 30mm to 999mm (PLC Controlled)
- 5) Container making machine
- 6) A collector Table of finished product (Manual) - US\$ 35,000 (Total 1 to 6 items)
- 7) A die change machine - US\$ 5,000
- 8) Foil Roll change machine (Hydraulic) - US\$ 8,000
- 9) Compressor - US\$ 10,000
- 10) Automatic Stacker Two cavity - US\$ 15,000

Production Capacity : 80 to 100 Per minute.
Subject to size of producing containers

Main Motor : 3.7 Kw

Air Pressure : Min. 5.5 Bar, Max 8.5 Bar

STANDARD MOULD / DIES

Alufoil, a world renowned expert in the manufacture of Aluminium Foil Containers Die / Mould/ Tools has developed its own systems of manufacturing Round or whether Rectangular, large or small round, multiple – out dies to single – out large shape configurations. These dies and tools can run well in excess of 60 to 70 per minute.

Mail Features : 1) Geometrical Accuracy 2) Superior Tool Steel 3) Effective operating 4) 5 years warranty 5) Latest Technology – by using same die, processing of foil of thickness as low as 35 Mic. upto 100 Mic. can be Comfortably carried out.
